

# Liars, Tigers, and Bears Club

## Unusual Party Guests

There are 6 party guests wearing masks, chatting happily, but as you approach they fall silent.

With a devilish smile showing teeth, a guest hands you a small note. It explains that the 6 of them are playing a party game. It reads:

## A Forest of Falsehoods

The six masked guests nod to you, each is wearing a mask of either a tiger or a bear, and they each tell you a piece of information that may or may not be true.

You're looking for Professor Cucumis, whom you've been told is the **Knight** of this club.

**Grizzly Bear:**

"Polar Bear always lies"

**Dawnfire Tiger:**

"Spectral Tiger is a Knife"

**Polar Bear:**

"I do, I always lie"

**Spectral Tiger:**

"All Tigers are Knaves"

**Sabertooth Tiger:**

"Both Knives are Bears."

**Lunar Bear:**

"Sabertooth Tiger's statement is true."

**Spectral Tiger:**

"Exactly two of the previous six statements are true"
